

STRATLOCK RAIL SYSTEM

SL-RCF90 PRODUCT GUIDE

STRATLOCK

SL-RCF90 Fixed wall connector

The SL-RCF90 is the foundation for all three connections available in the Stratlock Rail System. It provides installers with three connection options: a 90° fixed joint between the SL-RLE groove and profile end when building a wall, combines with SL-RCA180 for a wall to ceiling connection or SL-RCAB180 for wall to wall corner connection. Made of diecast aluminium alloy ADC12. Installs with provided small hex head grub screw (stainless steel).

BENEFITS

- No additional machining required
- Direct fixing into profile groove or end
- Stability nogs
- Minimal construction effort
- Screws into position with provided grub screws
- Instant 90° connection
- No special tools required for installation
- Diecast aluminium alloy ADC12
- Simple assembly, reversible installation
- Enables pre-assembly

APPLICATIONS

- Construction of straight framework against existing wall
- Blind walls
- Contract interior fit out
- Hotels, hospitals, retail, residential
- Exhibitions
- Fire-rated wall panels

SL-RCF90

USE WITH:

SL-RLE

SL-RCA180

SL-RCAB180

MATERIAL:

Diecast aluminium alloy ADC12
